Present:

BIOCONTROL FOR THE FARM

Three themed talks on how you can manage insects, weeds, and other pests while increasing beneficial habitat on your property. Developed for farms in the Willamette Valley.

Online - June 23, 30 & July 7

Registration is separate for each talk.

OSU EXTENSION SERVICE PROHIBITS DISCRIMINATION IN ALL ITS PROGRAMS, SERVICES, ACTIVITIES, AND MATERIALS. ACCOMMODATIONS ARE AVAILABLE, CONTACT HAYLEY WHITE:
971-612-0027 HAYLEY.WHITE@OREGONSTATE.EDU

PART 1 - INSECTS

An introduction to biocontrol and how to use it to manage pest insects while encouraging beneficial insects.

Heather Stoven (OSU Extension) and Corin Pease (Xerces Society)

Register at: <https://beav.es/3P2>

PART 2 - WEEDS

Using livestock and other biocontrol methods to manage weeds on your property.

Chris Schachtschneider (OSU Extension)

Joel Price (ODA) will give an update on Tansy Ragwort and the Cinnabar Moth.

Register at: <https://beav.es/3P8>

PART 3 - OTHER PESTS

A presentation on the life histories of rodents and how other wildlife species can aid in your biocontrol efforts.

Dana Sanchez (OSU Extension)

Register at: <https://beav.es/3PX>
